

BiteSphere · Local Food Delivery Marketplace

Hyper-local restaurant discovery with real-time kitchen camera telemetry & split-bill checkout.

Role: Product Designer | Timeline: 2024 | Tools: Figma, Design Tokens, Micro-Interactions

01 Problem Statement

Hidden fees, erratic delivery ETAs, and complex group ordering cause 65% cart abandonment on conventional food delivery platforms.

BiteSphere introduces upfront all-inclusive pricing, live kitchen prep stages, and one-tap group bill splitting.

02 Business Metrics

Checkout completion velocity accelerated from 110 seconds to 34 seconds.

Group ordering adoption surged by 55% during weekend peak hours.
