

FitPulse · Movement Habit Architecture

Glanceable workout logging, forgiving streak mechanics & coach telemetry for busy individuals.

Role: UX Engineer | Timeline: 2024 | Tools: Figma, React Native, Chart.js

01 Design Philosophy

Punitive streak mechanics cause users to quit fitness apps after missing a single day. FitPulse implements 'Forgiving Streaks' and quick 5-minute movement snacks.

High-contrast glanceable exercise displays allow effortless logging between high-intensity sets.

02 Engagement Metrics

60-day user retention increased by 31% compared to traditional fitness benchmarks.

Average logging duration per set decreased to under 4 seconds.
