

PennyWise · Modern Budgeting for First Salaries

Affordability radar, automated bill prediction & zero-guilt saving buckets for young professionals.

Role: UX Designer & Researcher | Timeline: 2024 | Tools: Figma, Behavioral Economics, Tokens

01 Context & Insight

Young earners entering the workforce find double-entry bookkeeping spreadsheets intimidating and confusing. They need a simple answer: 'Can I afford this today without risking rent next week?'

PennyWise creates an instant visual 'Safe-to-Spend' gauge backed by predictive bill deduction.

02 Financial Health Metrics

Users saved an average of \$320 in their first month using automated guilt-free buckets.

Overdraft incidents dropped by 74% across active beta testers.
